DETAILED ACTION

1. The following is a Notice of Allowability in response to the Amendment After Final Rejection received on 25 September 2006. Claims 33-37 have been cancelled. Claims 1-32 remain pending in this application.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in the Amendment After Final Rejection received on 25 September 2006 by Michael D. Smith, Reg. No. 41,181.

The application has been amended as follows:

IN THE CLAIMS:

Cancelled claims 32-37 per Amendment After Final Rejection.

REASONS FOR ALLOWANCE

3. Claims 1-32 are allowed.
4. The following is an examiner's statement of reasons for allowance:

As per claim 1, the prior art of record taken alone or in combination fails to teach during said given control loop time $T = N$, said calculated output control data from each individual control node is further transmitted over said communication bus to be later utilized by other control nodes coupled to said communication bus during a subsequent control loop time $T = N+1$.

As per claim 11, the prior art of record taken alone or in combination fails to teach during said given control loop time $T = N$, said calculated output control data from said first and second control nodes is further transmitted over said communication bus to be utilized during a subsequent control loop time $T = N+1$.

As per claim 21, the prior art of record taken alone or in combination fails to teach means for synchronizing, within a given control loop time $T = N$, a selected set of reference input signals and feedback signals to be used in producing said first and second actuator outputs; wherein said selected set of reference input signals and feedback signals used in producing said first and second actuator outputs are generated during a previous control loop $T = N-1$.

As per claim 28, the prior art of record taken alone or in combination fails to teach during said given control loop time $T = N$, said calculated output control data from each individual control node is further transmitted over a common communication bus to be later utilized by other control nodes coupled to said communication bus during a subsequent control loop time $T = N+1$.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
